Bringing Innovation Back to Europe!

DIA and RAPS are excited to once again jointly produce 2027 Combination Products in the EU, a summit convening 26-27 January at the Radisson Grand Place in Brussels, Belgium. This highly-interactive event will unite key stakeholders across the field—including representatives from EMA, the European Commission, Notified Bodies, National Competent Authorities and Industry—to explore a coordinated drug and device approach to incentivise competitive innovation in Europe.

With a distinct focus on finding solutions and creating efficiencies, 2027 Combination Products in the EU offers delegates a comprehensive overview of the current status of the EU MDR implementation, examining the nuances of Article 117 and discussing the process of obtaining notified body and competent authority

opinions. In addition, the event provides a unique forum for discussing the implications of the new EU Pharmaceutical Legislation on bringing combination products to market.

Throughout the summit, experts will exchange ideas via action-oriented working groups that stimulate ideation and innovation around designing solutions for pragmatic implementation.

By exploring current challenges and opportunities to unite for better pathways forward, the programme will highlight critical topics such as the changing EU regulatory landscape, EU AI Act, COMBINE, platform technologies, cybersecurity, home-use and self-administration, and so much more!

2027 COMBINATION PRODUCTS in the EU

Presented by DIA RAPS
